Research Festival on Tour – come along and join in!

Marvel at smoked salmon produced by a 3D printer, bring textbooks to life on smartphones or learn the basics of programming. The four-week Vienna Research Festival on Tour offers young and old the chance to immerse themselves in the exciting world of research and try out new technologies from Vienna. The popular exhibition takes place in Favoriten and Seestadt Aspern from 20 September to 16 October and is open to all.

Research for everyone!

Free guided tours give visitors the opportunity to encounter exciting new technologies, all conceived and developed in Vienna. With its playful approach, the Research Festival on Tour provides an accessible introduction to the world of research and technology for children aged six and above, young people and adults.

The research festival is organised and hosted by the Vienna Business Agency. The aim is to inspire minds with the wonder of research and technology and, together with Viennese companies, universities and research institutions, to show a broad audience what the city of Vienna can do.
